30-SEP-04: Peter PA1SDB monitored , and saw just this QRSS10 section which appeared such

01-OCT-04: 10:07 UT: The next day, the same thing happened, with another short opening. Or rather, 3

On the second image (left) I have drawn where the missing crown and "G" of the QRSS should be. You

01-OCT-04: A similar effect was noticed by Heinz OE5EEP: propagation suddenly "switched off" at 19:3

02-OCT-04: 14:08 UT: Beautiful clear reception by Peter PA1SDB. Propagation between G0UPL and PA

At 14:22 UT, the Hell section started. Note that the horizontal speed is a little too fast, so the letters app

And finally at 14:42, came the "crown" trademark signature.

03-OCT-04: Nice complete cycle from Heinz OE5EEP.

04-OCT-04: First reports from Erik ON4LP in Brugge JO11OE! He reported good reception from 12 UT c

04-OCT-04: This nice clear crown was part of the same cycle as the above Hell section.

By the way: Eric is the ~~closest~~ **closest** folder for reception, his distance ~~230~~ **238** km .

05-OCT-04: Good strong reception again the following day by Eric ON4LP between 11:30 and 12:20 UT

07-OCT-04 13:18 UT: The usual pattern with Peter PA1SDB: No reception all day, then briefly an excell

07-OCT-04: Unusual propagation conditions enabled Pierre ON5SL to receive these very faint traces of

2nd from Pierre
